

Product description 1.

Kuvings Whole Slow Juicer Chef CS600:

The Kuvings Whole Slow Juicer Chef is a professional and commercial cold press juicer with improved design providing you with more juice yield, more convenience and wholesome nutrition.

The Kuvings Commercial Whole Feed Juicer is ideal for catering establishments that want to offer fresh cold press juices.

The innovative design together with a strong powerful motor that can run for 8 hours, the Kuvings CS600 is ideal for busy juice bars, restaurants and hotels.

It is the first commercial vertical slow juicer with 3.5 wide feed chute that can accommodate whole fruits.

Most fruits and vegetables can be processed without pre-cutting.

Reduces the prep time and prevents extra nutritional loss from pre-cutting.

Powerful motor is equipped to operate for up to 24 hours making it great for restaurant, juice bar applications, hotels.

The patented low speed masticating technology gently squeezes ingredients preserving all the beneficial nutrients.

The low-speed gear reduction motor operates quietly and keeps the vibration level at its minimum.

The drip-free Smart Cap helps to create mixed juice and to rinse between recipes.

All parts are easily disassembled for cleaning. Comes with 3 special cleaning tools for easy clean up.

Stylish metal finished body.

No heat is generated and the rate of oxidation is grossly minimized thus extending shelf life of the juice for a couple of days refrigerated without preservatives.

Delivers juice that tastes noticeably different.

The cold press juicer slowly presses and squeezes rather than grind and chew thus giving the highest quality of juice compared to centrifugal high speed juicers. Ideal

1. The world's First Commercial Whole Slow Juicer
2. 40 litres per hour – Unique juicing system
3. Cold pressed type – newly designed bigger components
4. Extra-wide 3.5 inch feeding chute + side feeding chute
5. Stainless steel chassis – extra strength components
6. Heavy duty quiet motor – 200 watts efficient juicing

Product Description

Model	CS600
Color	Silver / Stainless Steel
Type	Vertical low-speed masticating
Speed	50 RPM
Wattage	200W
Dimensions	260* 183 * 515mm
Weight	9.1KG
Capacity	500ml 40 Litres per Hour
Materials	Ultem, Tritan, ABS, PC

88mm Flap Gate(Feeding basket) Faster and easier juice extracting The 88mm flip gate can take in entire ingredients, decreasing extracting time, saving the natural tastes of ingredients and minimizing nutrition loss. The flip gate ensures safe usage. Industrial grade motor, enables longer use (When using for commercial purposes, regularly clean out pulp left in the container.)
40dB Noise-reduction design Now with a low-speed rotating deceleration motor gets stronger, lower noise (40dB) and vibrations from the motor, which makes a well-situated use.

CS600 Cooking Style Recipes
